EXPERIENCE

Walmart, Inc.

Overland Park, KS

Online Grocery Pickup (OGP); Delivery Driver

January 2019 – March 2024

- Pioneered the implementation of OGP delivery, resulting in Overland Park's store becoming one of the first Walmart locations to adopt and refine the system by providing actionable feedback on delivery routes and enhancing user experiences to boost customer retention
- Conducted comprehensive training for new drivers and OGP pickers, focusing on standardized procedures and best practices to optimize efficiency and service quality
- Delivered exceptional customer service, effectively managing the needs and expectations of hundreds of customers daily, contributing to high satisfaction and loyalty rates
- Honed attention to detail, collaboration and problem-solving skills while preparing to re-enter the technology industry

DST Systems, Inc

Kansas City, MO

Staff Software Developer

January 2013 – June 2018

- Backend Software Developer working with COBOL
- Primarily used JCL to facilitate completion of various mutual fund processes such as liquidations and deconversions
- Standardized deconversion libraries across the company, enhancing reusability and efficiency for various projects by establishing a consistent framework
- Developed comprehensive documentation for standard deconversion tables, facilitating seamless integration with external agencies and ensuring project alignment
- Established a JIRA repository to track and manage development issues, enabling developers to efficiently address and resolve issues on a flexible timeline
